

IMPORTANT NOTIFICATION – voluntary recall ZEFAL bicycle bottles for children

ZEFAL SA (“ZEFAL”) has identified that certain ZEFAL bicycle bottles for children do not always meet ZEFAL’s high quality and safety standards. Tests show that in rare cases the push-pull valve may detach too easily.

There is a choking hazard in case the push-pull valve would detach while drinking. However, to date ZEFAL is not aware of any incidents or detaching valves. Nevertheless, since the affected bottles were specifically designed for children, out of an abundance of caution ZEFAL has decided to voluntarily undertake a recall of the affected bottles.

The affected bottles have been sold between **January 2017** and **January 2022** in a variety of prints and colors. All affected models are branded “ZEFAL” on the bottom of the bottle and are clearly recognizable as children bottle, with a height of only 158mm and filling capacity of 350ml.

Examples of the ZEFAL bottles (other prints and colors are possible)
